

Nayan Joshi

AI Engineer

AI Engineer with 5+ years building production systems - from video generation pipelines and agentic AI workflows to scalable backend infrastructure across cloud and Kubernetes environments.

WORK EXPERIENCE

Software Engineer - 2 SeedlingLabs Pvt Ltd

12/2025 - Present

Bangalore, Karnataka, India

Achievements/Tasks

- Built and deployed the VNC browser fleet on AWS ECS using t3.xlarge instances with auto-scaling, enabling parallel live test execution and recording for the Orchard AI testing platform.
- Designed the LLM prompt engineering layer that converts natural language test steps into executable Playwright JSON actions, with support for assertions, iframe handling, fuzzy matching, and spatial element resolution.
- Conducted and fully remediated a VAPT covering 55+ security findings (Critical, High, Medium, Low) across backend, frontend, infrastructure, cloud, and dependency layers; achieved HTTPS/TLS enforcement via AWS CloudFront.
- Deployed a production monitoring stack (Grafana, Prometheus, Loki, Alloy) across three EC2 hosts with EC2 service discovery, cAdvisor metrics, and cross-host security group configuration.
- Built www.orchard.com, an AI-powered browser test automation platform
- Tech: Python, PostgreSQL, GenAI, BrowserUse, Playwright, Vnc, Celery, Redis, Laminar

Senior Software Engineer Quilt Technologies Pvt Ltd

08/2024 - 11/2025

San Francisco, USA, Remote

Achievements/Tasks

- Used Kafka to asynchronously offload video generation processing, unblocking the API and retrieving output video URLs from blob storage via topic subscription
- Deployed and managed open-source video generation models on a Kubernetes cluster, hosting model pods for scalable, on-demand inference
- Implementing custom fine-tuning pipelines to optimize model performance for specific content types.
- Building RESTful APIs for seamless integration of AI-generated content into the app ecosystem Utilizing OpenAI and AWS APIs to create scalable content generation solutions.
- Optimizing prompt strategies to ensure high-quality, consistent content outputs.
- **Tech:** FastAPI, RestAPI, Kafka, Kubernetes, Neo4j, Python, Docker, AWS, Langgraph, Pydantic AI, Logfire

SKILLS

Languages: Python, TypeScript, C++

AI/ML: LLM, RAG, Agentic AI, Agentic Workflow, Generative AI, Langgraph, PydanticAI, Langfuse

Backend/APIs: FastAPI, REST API, GraphQL

Data & Vector Stores: Qdrant, Redis, Neo4j

Infra/DevOps: Kubernetes, Docker, Terraform, Kafka, Nginx, AWS

Monitoring/Observability: Grafana, Prometheus, Logfire, Langfuse

Tools: Git & GitHub, Postman

Fundamentals: Data Structures & Algorithms, OOD

CERTIFICATES

Building with the claude API Offered By Anthropic Education [🔗](#)

Code Chef Certificate in Data Structure & Algorithm. [🔗](#)

Career Bootcamp Coding Blocks

Problem Solving through C++

Unity Certified User : Programmer [🔗](#)

PERSONAL PROJECTS

AI Art Studio [Play store] [🔗](#)

- Built FastAPI backend with Langgraph agentic workflows for AI image generation using Replicate's models, enabling text-to-image creation for mobile app users
- Integrated Logfire for real-time API observability and performance monitoring across image generation pipelines and user requests
- Deployed backend services on Firebase with authentication, credit-based usage tracking, and serverless function management

Flight booking agents

- Built a multi-agent flight booking system using Pydantic AI, enabling structured, type-safe interactions between LLM agents and booking logic.
- Designed agent workflows to handle flight search, comparison, and booking tasks through natural language input.
- Implemented structured output validation with Pydantic models to ensure reliable, type-safe data flow between agent reasoning and downstream actions
- **Tech:** Python, Pydantic AI, Agentic AI

WORK EXPERIENCE

Software Engineer

Bombay Play Entertainment Pvt Ltd

02/2022 - 08/2024

Bangalore, Karnataka, India

Achievements/Tasks

- Led the Playable Ads team and drove content & feature releases for the Block Head team
- Participated in architecture, design, and implementation of front-end features using TypeScript and C++
- Tech : Node.js, Firebase, Typescript, CocosCreator, Unity, AWS

Software Engineer

Zynga India Pvt Ltd

08/2021 - 02/2022

Bangalore, Karnataka, India

Achievements/Tasks

- Implemented the Lives Wallet in the Up Up Monkey game and added extension methods to the app
- Worked on the Integration of Compliance Services in the App(Android & iOS)
- Optimized Audio Controller & Code refactor.
- Tech : Unity, React.js, AWS, SQL.

PERSONAL PROJECTS

SDK Integration App

- Firebase SDK integration.
- Firebase Notification & Crash Analytics integration.
- Firebase Login Page & Storing of user detail on firebase console.
- Tech: Android Studio, Java, Firebase.

EDUCATION

Bachelor of Technology

University of petroleum and Energy Studies

08/2017 - 08/2021

Courses

- Computer Graphics
- Data Structure & Algorithm
